BUILDING MADE EASY

5 steps to a brand-new home

1 Neighborhood, Floor Plan Design & Homesite.

View our website and speak with one of our Sales Manager's to help guide you to the perfect location and the best floor plan design to fit your style and the way you live.

2 Approval & Purchase.

Work with our preferred lender or your own bank to gain a pre-approval. While doing so, meet with your Sales Manager to sign and review all the paperwork required to purchase your new home. Your Sales Manager will help gather information on a broad range of customizable features, color schemes, cabinetry, countertops, flooring and much more to create a price proposal at the time of purchase agreement.

3 YourHome. YourStyle.

Get expert advice! A Design Consultant will contact you to set your Selection Appointment. You will be able to choose from included features and optional features to help design your home. This is your opportunity to reflect your style and personalize your home. Create the kitchen you have always wanted. You can choose from a variety of cabinets, countertops, appliances and details such as faucets and hardware. Many of these features are already included in the price of your home. Each homebuyer's budget is different, and whatever you decide to spend on the design of your home, your consultant will work within that budget.

From lumber drop to receiving your keys at closing, your Sales Manager is in contact throughout the entire process. You will attend a Pre-Construction meeting and a Homeowner Orientation with your Builder and receive weekly updates.

4 Construction Begins!
