

▶ STARTING FRAMING

Lumber will be delivered to your homesite and framing typically begins within a few days of its drop. You could be in this process now!

Homeowners are encouraged to visit the homesite and watch construction progress. Don't forget to take pictures!

Please note, you are entering a construction site and must be careful. Please discuss with your Field Superintendent if you have any concerns. Also, note the surrounding areas of your home may have loose nails and other debris. We recommend parking down the road to avoid any tire damage. We are not responsible for damage to tires, person or vehicles.

ITEMS TO BE COMPLETED IN THIS STAGE:

- Lumber Drop
- Frame

REMINDER:

Questions about construction? Contact your Field Superintendent directly on his/her cell phone.

Having issues getting a response? Sometimes our Field Superintendents can get busy in the field. If at any time you are having difficulty getting in touch, please let our office know.
